

Student Expectations and Guidelines for Geography Bee

- The Geography Bee will meet once a week for six weeks during lunch in December and January.
- It is hoped that students will be motivated to come to all practices and remain for the entire session.
- If students have a conflict with another activity they should tell Ms. Roohi about it beforehand.
- Since the students are eating lunch in the library lunch room they must clean up after themselves.
- Students must conduct themselves in the same manner as they would if they were out in the main library (no yelling, rough housing, etc.).
- Students will be given a study packet before winter break if they desire to study over break.
- There will be a school Geography Bee at the end of January. There will be one winner and one runner up. The winner will take a qualifying test for the national Bee. If the winner is not available, the runner up will take the test.
- At the Geography Bee all decisions of the judge are final.
