

Student Expectations and Guidelines for Math Counts

- Math Counts will meet once a week from mid-October through February.
- It is hoped that students will be motivated to come to all practice and remain for the entire session.
- If students have a conflict with another activity, they should contact Mr. Roberts about it in advance.
- Since the students will be eating lunch in Mr. Roberts' classroom, they must clean up after themselves.
- Students must conduct themselves in the same manner as they would if they would in class.
- Each week, Math Counts members will work practice problems to learn, grow, and prepare for the chapter completion.
- In early January, the Goldenview Math Counts competition team will be selected.
- February 10, 2018 is the Anchorage Chapter Competition. All decisions of the judges are final.
